Subject: REACH – SVHC

Dear customer,

Thank you for your enquiry on REACH. We are well aware of REACH and the fact that it entered into force as European Regulation, as well as of the projected timetable for pre-registration and registration.

The Regulation will have significant impact on all manufacturers, importers and downstream users in the EU, and require their joint collaboration across all supply chains.

There is a general concern about the potential for some chemical substances to be withdrawn from the European market as a consequence of REACH, either due to regulatory action or commercial considerations, and the impact this may have for downstream users.

We are committed to meeting our legal obligations under REACH, as a manufacturer / importer / downstream user and started preparing ourselves for it a long time ago. We pre-registered all the substances we currently manufacture or import and that are liable for registration.

However, as important technical details – e.g. guiding documents (RIPs) are still under development, we cannot yet fully assess the impact of REACH on our product portfolio, and we reserve the right to make changes to our portfolio.

With respect to the Candidate List of Substances of Very High Concern (SVHC) for authorization as published by the European Chemicals Agency (ECHA) on June 18, 2010 we can confirm that we do not intentionally add or formulate SVHC in our products in the attached list.

With kind regards,

Momentive Performance Materials
