Subject : REACH – your enquiry

Dear customer

Thank you for your inquiry regarding the status of the Momentive products contained in the attached list under the EU's REACH Regulation 1907/2006 dated 1 June 2007.

Momentive confirms that we have already pre-registered or registered all substances that Momentive currently manufactures in the EU or that Momentive imports into the EU and that fall under the registration obligations of the REACH regulation. All substances that are subject to REACH and that compose the products on the list above, including the monomers and other substances from which any polymeric components are made, have been pre-registered or registered by Momentive or by our upstream suppliers in the EU. We fully intend to pursue full registration of all of these components according to the timeline set forth in the regulation. Thus if you purchase these products from us in the EU we can assure you that all REACH registration obligations for this product have been fulfilled.

It is important to recognize that if you purchase any of these products outside the EU and subsequently import it (or a preparation containing it -- *i.e.* before it has been reacted to form an article as defined by REACH) to the EU, then Momentive will not be the importer of record and our registration will not fulfill your obligations under REACH.

Please feel free to contact me if you have further questions.

Truly yours,

Ralf Maecker
REACH Manager
