

Stratos Lightwave™ are industry leaders, offering the largest range of optical interconnect solutions, providing cutting edge performance optical transceivers, miniaturised form factors, and precision high-density fibre optics. Stratos Lightwave™ is optimally positioned to achieve the synergy that results from broad spectrum of fibre optic disciplines and manufacturing capabilities.

Total package solutions

Stratos Lightwave™ can take your signal from the electronic to the optical domain, and back again, via our industry leading range of optoelectronic and fibre optic components, including the latest innovations such as MPX™ Backplane and fibre flex circuits.

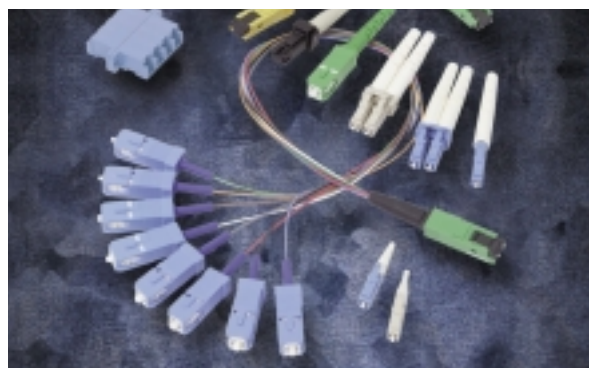

Electrical to Optical Domain

Stratos Lightwave™ offer a full range of transceiver products to convert electrical signals to optical and back at various data rates and formats up to 2.5 Gb/s.

Transceiver connectivity

- ST™
- SC
- FC/PC
- LC™
- MPX™
- Fibre flex circuits
- Miniaturised multi way connectors
- Varieties of pigtails, with various connector lengths and cable constructions are terminated at Stratos Ltd.

External Equipment interface

Stratos Lightwave™ are experts in designing and manufacturing systems for use in harsh environment applications.

External Deployable Cables

Stratos Lightwave™ harsh environment product portfolio includes complete cable harnesses available with deployable cable drums manufactured to ISO 9001 approved standards.
