

Termination & Repair Kit

- Complete range of tools for termination of both Singlmode and Multimode fibre cables
- Allows 'in field' termination and repair of harsh environment products
- Pre formed plastic foam secures tooling during transit and allows simple checking of inventory
- The lid of the termination case can be used as polishing platform during field termination
- Compartment within the lid to store procedures and relevant information
- Rugged but aesthetically pleasing, ideal for field use or in house terminations

Repair Splice

- Provides permanent 'in field' repair of damaged or broken fibre optic cables
- Fast termination, no power, no heat
- High performance for both Singlemode and Multimode
- Rugged housing providing full mechanical and environmental sealing
- Maintains original cable performance and tensile load
