

Silicone Solutions for Drones and UAVs

Advanced silicone products that meet the challenges of next generation mobility

At Momentive we understand the unique challenges of the drone industry. Hardware boundaries are constantly pushed as the role of drones and unmanned aerial vehicles evolves. You need materials that can keep up. That's why Momentive's advanced silicones are ideal for drone assembly and maintenance and repair operations. Our broad range of silicone products can provide environmental protection, increase hardware reliability, improve sensor performance and extend component life. From launch to landing, Momentive's advanced silicone products enable the next generation of UAVs.

Typical Benefits of Silicones for Drones and UAVs

- Maintains critical properties for extended time over a wide rang of extreme temperatures -115°C (-175°F) to 260°C (500°F)
- Sustained flexibility in extreme low temperatures
- Excellent dielectric and thermal insulation
- Very strong adhesion with primer to support structural integrity
- UV and ozone resistance
- Cures at room temperature
- Available low outgassing solutions that meet or exceed ASTM E595 testing standards
- Available in paste to flowable viscosities to accommodate a wide range of applications

POTENTIAL APPLICATIONS

Thermal Management

Vibration dampening

Stress reduction

Waterproofing and case sealing

Protective coatings for critical circuits and components

Sensor lens coatings to protect and improve LIDAR transmission rates

Optical bonding for enhanced displays
